

ANTHEMION  
RESTORATION

# 14 St John's Lane, London

A case study on specialist façade restoration

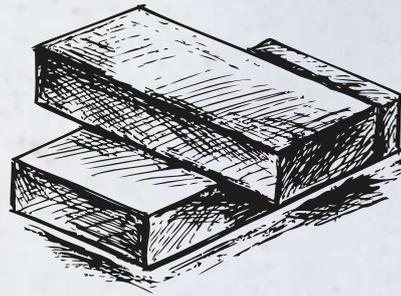

2

ABOUT US

Anthemion Restoration specialises in heritage building restoration, new masonry finishes, hard landscaping, and internal stone finishes.

3

We're dedicated to preserving the character and craftsmanship of our architectural heritage. Our skilled experts blend traditional techniques with modern precision, giving us the ability to craft contemporary landmarks and meticulously restore historic ones.

Tailoring our approach to every project's unique demands, we forge partnerships, leaving our mark in building conservation and restoration.

Lee Keelan  
Managing Director

14 St John's Lane, London

#### THE PROJECT

Anthemion Restoration were appointed by Curo Construction to handle specialist façade works as part of a wider refurbishment at this six-storey office building in Clerkenwell, London.

#### CLIENT

Curo  
Construction

#### PROJECT VALUE

£210,000

#### SPECIALITY

KEIM paint  
system

#### THE CHALLENGE

The brief was clear: refresh the building while respecting the constraints of the existing fabric. Our scope focused on the careful cleaning, repair and re-finishing of the building's GRP façade elements. It's a material often mistaken for stone but requires a different approach, and getting it right makes all the difference.

The primary challenge was managing the ageing GRP and achieving a consistent finish across surfaces. We also needed work efficiently at height while maintaining programme and quality.

We tinted the bricks from red to black using a KEIM paint system. It's a high-performance building protection system renowned for its breathability, durability, and eco-friendly properties.

#### THE SOLUTION

Our team used extensive trials to achieve the correct colour, texture and consistency. The KEIM system is also backed by a 20-year colour consistency guarantee, providing long-term confidence for the client.

Access was managed efficiently using a hoisting system for safe, controlled working at height, minimising disruption to the surrounding area.

#### THE OUTCOME

The results speak for themselves. We delivered a façade that looks refreshed, performs better, and meets modern expectations. Specialist restoration, done properly. Another building ready for its next chapter.
